DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 4 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim (WO 00/44990 and U.S. Patent 6,637,973, respectively). Kim discloses a system comprising a light reflecting material (Figure 7, for example) installed on a road surface (200) linearly along the centerline (Figure 1, for example). The material (80) is shown to be longer than the length of vehicles. The system operates in the same manner as the present invention; i.e., light is received from a vehicle and transmitted forwardly of the vehicle and reflected towards oncoming vehicles and the system is optionally positioned on a side of the road (abstract, for example). While the system of Kim is designed for use with headlights (see abstract, for example), the system would inherently operate in the same manner when used with turn signals, since the light would still be received and emitted by the system of Kim. Kim does not teach the position relative to an intersection; however, Figure 1 clearly shows the system to be installed near the end of a barrier which certainly could be installed at an intersection. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have installed the system of Kim near an intersection in order to provide as continuous coverage as practical along a roadway.

Response to Arguments

3. Applicant's arguments filed February 23, 2004 have been fully considered but they are not persuasive. The differences between the present invention and Kim are noted; however, Kim the claim limitations are not sufficient to patentably distinguish from Kim. Note in the abstract and Figures 8 and 9 that the apparatus of Kim is installed on a side of the road, thereby meeting that recitation. Also note in Figure 1 that the apparatus extends to an end of a barrier, which could certainly be near an intersection. Therefore, it is within ordinary skill for the apparatus of Kim to be positioned in a manner such that claim limitations are met.

Conclusion

- 4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
- 5. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
